 **scholaar**

Scholaar.com **is content and media-rich online platform for Students, Teachers, and libraries with** collection of databases in various subjects such as Agriculture, Business & Management, Chemistry, Computer Science, Earth & Environmental Science, Education & Psychology, Engineering & Technology, Food Science, Hospitality & Tourism, Life Science, Mathematics & Statistics and Physics with more than 2300+ articles. Designed with easy-to-use functionality, relevant and reliable content, images, videos to help students and teachers in their research and study needs. Our goal is to promote digital literacy and 21st century learning skills.

Features

- Any Number of users
- Thousands of Articles
- New articles added yearly
- Unlimited access across the campus and at home
- Ultimate tool for classroom teaching and libraries
- Designed for students and teachers
- Curriculum aligned content
- Written, Compiled, and edited by Experts
- Images
- Videos
- And Many More...

Dashboard

The screenshot shows the iScholaar dashboard interface. At the top left is the iScholaar logo. At the top right, it says "Welcome :Demo1234 | Dashboard | Reports | Lo". Below the logo is a blue header bar with the word "Dashboard" in white. Underneath the header bar are two green buttons: "Browse Subjects" and "Reports". Below these buttons is a grid of 12 subject categories, each with a representative image and a text label. Two yellow callout boxes with arrows point to the "Browse Subjects" and "Reports" buttons. The "Browse Subjects" callout says "Click on Browse Subjects to see the Subjects." The "Reports" callout says "Click on Reports to see the detailed usage reports."

Animal Power

There are a few designs available for equipment suitable for animal power systems. This is a major way farmers plow land in many developing countries of the World. Because of the power involved in pulling a no-till seeder through the soil without plowing, these are often single row systems, although some designs use 2 or more rows. In some designs, the system uses a sub-soiler or chisel to break a plow pan, leaving a furrow to either hand sow seed and apply fertilizer. Or a seed box and fertilizer can be attached to do this in one pass.

Navigating a Topic

The screenshot displays the Scholaar website interface for the topic 'Conservation Agriculture'. On the left, a 'Table of Contents' sidebar lists six sections: 1. DEFINITION OF CONSERVATION AGRICULTURE, 2. BASIC PRINCIPLES OF CONSERVATION AGRICULTURE, 3. PURPOSE OF CONSERVATION AGRICULTURE, 4. CONSERVATION AGRICULTURE IN THE WORLD, 5. CHALLENGES FOR CONSERVATION AGRICULTURE, and 6. REFERENCES. The main content area features a video player for 'Cover Crop Terminating Equipment' with a play button. Below the video is the text 'USDA-ARS Auburn, AL' and a video description: 'Video 2: Small scale equipment for conservation agriculture.' The page also includes a search bar at the top, navigation links (Dashboard | Logout | About Us | Contact Us), and a 'Conservation Agriculture' header with 'Back', 'Print', 'Play', and 'Stop' buttons. Three yellow callout boxes provide instructions: one points to the Table of Contents, another points to the video player, and a third points to the Print and Play buttons.

Manual Systems

Many farmers in developing countries do not have access to tractors to help them plow, let alone plant seeds. However, there has been work to develop simple, low-cost systems like the "matracha" shown in these photographs. They even have a system that separates seed and fertilizer like the "matracha" shown, applied at the same date of planting. In some cases, a furrow can be opened by a hand-drawn, powered chisel or sub-soiler, and the farmers plant seed and applies basal fertilizer by hand.

Cover Crop Terminating Equipment

USDA-ARS
Auburn, AL

Video 2: Small scale equipment for conservation agriculture.

History of Conservation Agriculture

In the 1930s, soil erosion in the United States reached crisis proportions. The problem was particularly severe in the Midwest, where millions of tons of topsoil were blown away by the wind or
